HEAD OFFICE AND NURSERIES AT HEILOO, HOLLAND

Heiloo, Holland, May 1954
our eighty-fourth year

In presenting our 1954 Fall catalogue we take this opportunity to extend our sincere thanks to our many Friends and Customers, for their past favours.

Again we are more than pleased to say that our crop this year gives us a chance to offer even a more desirable quality of finer, larger bulbs than ever before.

Our reason for being in a position to say that our bulbs are better is not an overstatement nor an idle boast. Constant costly research at our Holland Nurseries, founded in 1870, crop after crop, year after year, has enabled us to make each successive planting a better one. We realize this is a costly factor running our nurseries but it pays for itself in producing real customer-satisfaction with bulbs of highest productivity and more gorgeous blooms.

In this catalogue we have added several new introductions and have deleted some of the older varieties that have been superseded.

Despite the extra costs incurred in producing deJager Superb Quality Bulbs, the selling prices have always been kept at a moderate level, usually no higher than the prices of ordinary bulbs.

We greatly appreciate your patronage and look forward to being of further and greater service to you. May we suggest that you place your order for bulbs as soon as possible so that we can have them delivered to you at the proper planting time.

GOLD MEDAL TULIPS

We make a great Speciality of Tulips

Tulips belong to the most beautiful of Spring Flowers. Graceful and of impressive beauty they provide a brilliant colour display in the garden for at least two months in succession. Tulips are of easy culture as they are quite hardy and free flowering in either a sunny or shady situation.

A careful selection of varieties is advised to ensure a continuous flowering period. **Kaufmanniana** Tulips and other **Rare Tulip Species** bring a gay colour riot in the Rockery or border when **Narcissi** are almost over. Early in April, the **Single Early** Tulips are in bloom, celebrating with fine colours the arrival of a new season. A little later the **Early Double** Tulips attract the attention with their colourful and peony-like flowers, **Mendel** and **Triumph** Tulips with their long stems, vigorous habit and wonderful shades are the finishing touch of April. In a wide range of shades, self-colours and bi-colours, they give brilliancy to the Garden when flowers are needed to bridge the interval until May.

All through May, **Darwin**, **Cottage**, **Lily-Flowering**, **Parrot**, **Breeder** and **Double Late** Tulips are in bloom at almost the same time or in this succession. They give a parade of brilliant colours from pure white to almost black, from softest pink to deepest purple, all on splendid stems and with great alterations in form.

All Tulips are extremely useful for the garden and bring gaiety, pleasure and satisfaction.

Collections of Tulips: Of all different sections of Tulips, we offer in this catalogue very fine Collections which are carefully chosen and assembled to give entire satisfaction in your garden, border or for plantings anywhere around your home. The easiest to grow, distinct and dependable varieties are selected to produce an harmonious display of balanced beauty in a full range of colours.

Each variety is separately packaged and correctly labelled. All bulbs are choice selected varieties of top size.

Anyone not familiar with names of Tulips may order de Jager's Collections with every confidence and which are offered at a good saving too.

Outdoor Planting: Plant Tulips in groups of 6 or 12 to make a good display in the border or bed, 6 in. apart and 4 in. deep. They can be planted in Autumn until severe frosts set in. Tulips thrive well in any type of soil but if heavy, add some sand. Well cultivated and well drained soil is important. Dig soil before planting and do not have Tulips in the same location some years in succession, unless the soil has been removed and replaced with fresh at a depth of at least one foot. Inattention to this matter is often the cause of failure with Tulips. It is advised never to allow any part of the dead foliage or flower to drop on the ground. These parts carry diseases and infect the soil. Only use well decayed and old manure.

For Forcing: Early Tulips (single and double) including Mendel Tulips are suitable for earliest forcing, while Darwin and Triumph Tulips are for late forcing. After planting and plunging the Tulips it will take at least 10–12 weeks, before the shoots and sprouts are high enough that they may be brought into a dark room at a temperature of 55–60° F. to allow the stems to lengthen. After 10 days to two weeks the Tulips can be removed into a light warm room. For a few days, the bulbs should be covered with some paper before exposing to the full light. Tulips should never be hurried and bottom heat and draught should be avoided. Generally speaking, Amateurs should never bring in the bulbs, until the shoots are 3 to 4 in. high and after the middle of January.

Origin: The first time Tulips were ever mentioned, was in 1554, when Busbequis found a few specimen near Constantinople. Six years later, Carolus Clusius brought some of these Tulips to Holland and in 1601 he described 19 varieties in full detail and added 5 pictures. Dodonaeus wrote about Tulips in his *Kruidtboek* in 1618 and made three different sections. Most of the Tulips had broken colours and this was considered very fashionable. In 1634–1637, during the Tulipmania, fantastic prices were paid for bulbs, e.g. 1 *Semper Augustus* \$ 2200.—., weight 2000 aces. The bulbs were sold per 'ace', one ounce is 5900 aces, and a good tulip bulb weighs now 7000 aces.

Darwin Tulips

(May-flowering)

We confidently recommend this late-flowering section of self coloured Tulips, with their stately bearing and rich colours. They deserve universal attention and are wonderfully valuable for bedding, borders etc. on account of their brilliant colours and their long upright stems. The Darwins flower after the Triumph Tulips and are excellent for cutting, just at the time when the spring flowers are over and there is scarcity of flowers in the open ground. As cut-flowers they are beautiful for decoration in vases and last a long time in water.

Origin: A collection of Tulips imported from the North of France by Messrs. Krelage & Son at Haarlem. The actual origin is not known, but they were offered and brought into circulation in 1889, when they caused a real sensation, because of their long stems and fine colours.

For Forcing: Some varieties marked with an asterisk (*) are suitable for late forcing. They should never be forced in too high a temperature and should be watered moderately. Darwin Tulips cannot be had in flower much before February, with the exception of the varieties Wm. Copland, and Rose Copland, which may be brought into the greenhouse after December 25th.

COLLECTIONS OF TALL GIANT DARWIN TULIPS

New Darwin Hybrid Tulips

These new Darwin Hybrid Tulips are most exceptional because of their exciting brilliancy of colours, fabulous size and splendid stature. They are absolutely the largest Tulips raised to date, their recent introduction caused quite a sensation among the Dutch growers and in preparing the present revision of the Tentative List of Tulip names, the Tulip-Committee has thought it wise to make a new Sub-Division (9a) for these wonderful Tulips, results from a crossing between Darwin Tulips Tulipa Fosteriana.

- Apeldoorn** (28), a magnificent introduction producing very large oval-shaped flowers of orange-scarlet with black base edged yellow, very enchanting. \$ **1.00** each; \$ **10.00** per doz.
- Canopus** (24), the exceptionally brilliant colour of this vivid red Tulip is indeed fascinating, producing a plant of strong growth and stands up to adverse weather conditions. Ideal for beauty spots in the garden when a startling effect is desired. \$ **2.50** each.
- Dover** (26), A.M. Haarlem 1953, a brand new novelty of enormous size and outstanding beauty, its colour is a fascinating shade of oriental scarlet, purple-black base, with yellow ring, this variety caused great sensation among the Dutch growers when first shown, truly a very charming and superior Tulip. \$ **1.00** each; \$ **10.00** per doz.
- Dr. Philips** (26), a very large flower of globular form, colour a pleasing shade of vivid orange-red shading lighter towards edge of petals, having a tint of purple in the centre of each petal, very beautiful. \$ **7.00** each

Breeder Tulips

(May-flowering)

These majestic Tulips have gained important prominence in the gardens of real amateurs, as they produce a most artistic effect by their refined flowers, which are held on heavy upright stems. Their fascinating colours are rich shades and tints in glorious autumnal purple and gold, and bronze orange, yellowish, soft copper and combinations of such colours. These colours which rival the glorious rich tints of Indian Summer, are not to be found in other May-flowering Tulips, and on account of their enormous size and vigorous growth, yet perfect in form and proportion, Breeder Tulips are a wonderful addition to the garden.

Cottage Tulips

(May-flowering)

Cottage Tulips are so named because they have mostly been found in old Cottage Gardens of Great Britain and France, where they have been growing for a great number of years. They are distinct in habit, embrace many beautiful colours, and are excellent for borders, where they should be freely planted in large clumps or masses. They may also be naturalized in grass, wild Gardens, etc. and present a gorgeous display during the month of May.

COLLECTIONS OF COTTAGE TULIPS

As in all collections of Bulbs offered in this catalogue, our collections of Cottage Tulips are made up very carefully, comprise a full range of colours and varieties of good merit only. Customers may rest assured to receive all Top-Size bulbs.

Triumph Tulips

(Mid-Season)

A race of Tulips with most outstanding characteristics and merits. They are exceedingly valuable for the Flower-Garden, in borders etc. on account of their strong tall stems and vigorous habit. Most pleasing shades of the self-colours, bi-colours, edges, flushes, stripes and margins, which will not be found in other types of Tulips and this stresses the beauty of this section. Triumph Tulips flower immediately after the Mendel Tulips and are a valuable addition to obtain a continuous colour display of Tulips. Some varieties will force steadily, but the substance and the size of the flowers are superior.

Origin: This group is a result of hybridising Single Early Tulips with Darwin, Breeder or Cottage Tulips. The first introductions came from Messrs. Zocher & Co, at Haarlem in 1918. Five years later, they were officially registered as Triumph Tulips.

Mendel Tulips

(Mid-season)

This type owes its particular value to the fact that it has contracted the glorious colours and the astounding value for the garden of the Darwin Tulips and the earliness of Duc van Tholl. They are of excellent habit and beauty and flower in the garden 10 to 14 days earlier than Darwins, thus bridging the interval between Single Early and Triumph Tulips. Most varieties can be forced quite easily, early and in a short time and this adds considerably to their value. In the description of each variety, the approximate forcing date is mentioned.

Origin: The name of this race was given to a group of varieties obtained from cross-pollination between Duc van Tholl and Darwin Tulips by Messrs. E. H. Krelage & Son of Haarlem, Holland. These seedlings flowered for the first time in 1915 and were introduced at Haarlem in 1921. They caused a real sensation and fancy prices were paid for the stocks.

Forcing: They may at once be exposed to the full light contrary to all other Tulips which should be started in the dark. If for some unforeseen reason the height is not obtained and the bulbs are found to be lazy, they should be left in the dark for a few days and thus encourage the sprouts to lengthen. See information on page 2.

COLLECTIONS OF MENDEL TULIPS

These collections of Mendel Tulips are made up of such varieties that are particularly suitable for pot and bowl culture for flowering in the later part of January. They are, of course, also suitable for planting outdoors.

For many garden-amateurs the range of varieties offered in this list may be somewhat overwhelming, so if you are not familiar with them, please order our collections, which are made up very carefully as we want them to give complete satisfaction and therefore only include varieties of proven merit, at the same time giving a wide range of colours.

Origin: All the Parrot Tulips are sports of Tulips from various sections and with the exception of their lacinated segments, they have more or less the same qualities as their originators. It is known that of the old varieties *Lutea major* and *Markgraaf van Baden* were in existence in 1680, with these and some other old varieties, they are still grown. New Parrot Tulips are all strong, tall and dependable in blooming, whereas the old varieties are shy bloomers with weak stems.

The varieties of these collections are outstanding in beauty and fascination, in full colour harmony and suitable for garden and cutting purposes.

Early Double Tulips

Double flowering Tulips are of fairly robust growth and have massive flowers, in many cases they are as large as small Peonies, and last somewhat longer than Single Tulips. The Double Tulips are not so elegantly formed as Single Tulips, nevertheless they are exceedingly useful and effective for bedding purposes. Most of the Double varieties are excellent forcers and make fine displays when grown in pots, pans, boxes, etc., they should, however, be forced slowly.

COLLECTIONS OF EARLY DOUBLE TULIPS

We include in our collections of Early Double Tulips five beautiful different coloured varieties of the same habit and height, which we can recommend with every confidence.

Fosteriana Species & Hybrids

Is it not somewhat remarkable to think that after more than three centuries of careful cultivation and hybridising, Western Europe has not been able to produce anything to match in size and brilliancy of colour with these Bokhara Tulips growing wild on the mountain slopes of the Asiatic desert. We may, however, predict that by the influence of *Tulipa Fosteriana* in course of time an extremely large new strain of Tulips will be produced that will stand out in size and colour such as *Tulipa Fosteriana Red Emperor* (Mad. Lefeber), *Holland's Glory* etc.

New Fosteriana Mixed Hybrid Tulips, we offer for the first time a very fine Mixture of colours of these new Masterpiece Tulips, which come from a crossing between *Fosteriana* and *Kaufmanniana* Tulips. They produce many different pastel shades and have most wonderful conspicuous coloured hearts and are exceptionally choice, erotic, fascinating and beautiful. Limited stock.

Purissima (Hybrid) (20), a most outstanding novelty, one of the marvels of this unique race, the colour is milky white and the only white one, ever been raised in this section, very remarkable large flower, long lasting and constantly fresh looking, its effect is of delicate loveliness.

80 cts. each; \$ 8.00 per doz.

Red Riband (Hybrid) (18), a gorgeous variety with brilliant red colour, bright yellow on the base, black edged, a very handsome flower of enormous substance, borne on a rigid stem, a very showy garden Tulip, flowering in the second half of April.

\$ 1.00 per 3; \$ 3.75 per doz.

Kaufmanniana Species & Hybrids

(Waterlily Tulips)

This is one of the most remarkable group of Hybrids of recent introduction from the beautiful Tulipa Kaufmanniana. They flower far ahead of other Tulips on short stems, they establish themselves easily, coming up freely year after year without any care. Most of them have mottled, striped, or spotted foliage like Greigii, which is a beautiful and interesting characteristic on its own. We very strongly recommend them for the rock-garden, border and other places where they can be left undisturbed.

Elite Mixture (Peacock Tulips). We offer a very fine Mixture raised from Greigii × Kaufmanniana which will be found far superior to what is usually sold as Kaufmanniana Hybrid Rainbow Mixture. Including many surprise-seedlings of exciting and unusual colour-combinations with lovely and interesting mottled foliage. **\$ 3.00 per doz.; \$ 21.00 per 100**

Kaufmanniana (Waterlily Tulip) (Central Asia) (6), a charming species, producing in March large flowers of elegant form and remarkable beauty, opening out to a great size in the sun; colour soft creamy-white, centre slightly marked with carmine-red, strongly recommended for planting in groups in borders and in rock-gardens, they may be left undisturbed and will flower for many years. **\$ 2.00 per doz.; \$ 14.00 per 100**

Alfred Cortot (Hybrid) (8), an outstanding Hybrid on account of its striking colour of glowing bright scarlet with a jet-black base and beautifully mottled leaves. Highly recommended at R.H.S. Wisley trials 1948, very rare. **\$ 2.00 per 3; \$ 7.50 per doz.**

Aurora (6), a golden beauty of exquisite loveliness, colour deep yellow, exterior of outer petals vivid scarlet-red, edged yellow (see illustration opposite page 40). **\$ 1.00 per 3; \$ 3.75 per doz.**

Berlioz (Hybrid) (5), a flower of exquisite loveliness and one of the most outstanding beauties in this section, the very elegantly formed flower is uniform golden yellow, exterior of the three outer petals slightly flushed Turkish-red, distinctly marked brown foliage. **70 cts. each; \$ 7.00 per doz.**

Brilliant (8), fine Turkish-red variety, only a very few bulbs for disposal the present season, rare. **60 cts. each; \$ 6.00 per doz.**

César Franck (8), one of the most beautiful and striking members of this group, flowers are deep yellow having a broad orange-red flame on the outer petals. **35 cts. each; \$ 3.50 per doz.**

coccinea, A. M., R.H.S. 1948, an extremely beautiful species of a uniform carmine-red, very outstanding in colour and a beauty for the rock-garden. **50 cts. each; \$ 5.00 per doz.**

Edwin Fisher (Hybrid) (8), a charming flower, yellow with upright large breadth salmon-red blotch on outer petals; inner petals yellow with a very small red stripe, base orange-yellow, marked with black and red blotches. **45 cts. each; \$ 4.50 per doz.**

Elliott (8), this is a very beautiful variety, producing very large flowers, interior white, outside petals carmine. **75 cts. per 3; \$ 2.75 per doz.**

Fritz Kreisler (8), this is a magnificent Tulip of breath-taking beauty, colour a lovely warm water-melon-rose, slightly paler towards margin, very rare new introduction, only a few bulbs available of this novelty (see illustration opposite page 40). **70 cts. each; \$ 7.00 per doz.**

Gaiety (4), this truly represents a Water-lily as the very large flowers seem to rest on their sturdy foliage, the lovely flowers open up to an enormous size in the sun, interior creamy-white with large orange-yellow base, outer petals marked pinkish-red, a sturdy grower and distinguished variety, now becoming very scarce (see illustration page 35). **\$ 1.00 per 3; \$ 3.75 per doz.**

Glück (Hybrid) (9), a charming and extremely attractive flower of a soft yellow with a red patch on outer petals, foliage with conspicuous brown markings. **\$ 1.00 per 3; \$ 3.75 per doz.**

Goldene Sonne (Hybrid) (8), strikingly beautiful on account of its deep golden yellow with conspicuous scarlet edges on outer petals, imposing appearance, one of the most outstanding hybrids of this section, foliage distinctly mottled. **\$ 1.50 per 3; \$ 5.50 per doz.**

Goudstuk (Gold Coin) (Hybrid) (5), a charming variety producing large flowers with exceptional broad petals of deep golden yellow with crimson ring inside of bloom, very exquisite and rich. **90 cts. each; \$ 2.50 per 3**

Johan Strauss (Hybrid) (8), a dainty white flower with a cream centre, exterior flushed with red, deep green foliage, mottled brown.

75 cts. per 3; \$ 2.75 per doz.

Josef Kafka (Hybrid) (5), F.C.C. London, this is one of the darkest yellow Kaufmanniana hybrids in cultivation, exterior golden yellow with an extremely large and conspicuous scarlet centre, sure one of the most striking Tulips, leaves mottled.

\$ 4.00 each

Lady Rose (8), this is a remarkable species of great beauty and interest and it is a magnificent addition to the Kaufmanniana family, colour lovely rose, slightly paler towards margin. \$ 1.30 each; \$ 3.60 per 3

Lotus (11), a pretty and the tallest member of the Kaufmanniana family, colour milky-white with pointed petals, outside of flower marked pinkish-red and has a conspicuous deep-yellow base, very rare.

Vivaldi (Hybrid) (6), a very striking flower of a creamy-yellow colour, outer petals with broad crimson blotch, having a conspicuous crimson ring round a large bronzy base; leaves prettily dotted brown, very fine.

75 cts. per 3; \$ 2.75 per doz.

Kaufmanniana Gaiety

It sometimes happens that a stem-leaf becomes attached to the flower bud of a Tulip. In order to allow the bud to follow its natural course, it is essential to cut the leaf at the base and let it remain attached to the flower. It will then develop properly and will do no harm to the bloom.

Rare Tulip Species

Some of the Tulip Species are very scarce, therefore please order early to ensure delivery. A large number of the dainty and small species like *Linifolia*, *Batalini*, *Eichleri*, etc., are especially recommended for the rock-garden, where the little groups of flowers are best seen to advantage. The large and more sturdy growers such as the *Fosteriana*'s, *Kaufmanniana*'s (listed under separate groups), and *Acuminata* with its wired horned petals are unequalled in a herbaceous border, where they multiply its excitement and glory in springtime.

COLLECTIONS OF RARE TULIP SPECIES

As in all our collections of bulbs offered in this catalogue, the collections of Rare Tulip Species are made up very carefully, containing the best and most interesting for the rock-garden and other choice places.

25 Bulbs, 5 each of 5 varieties, our selection	\$ 2.75

Acuminata (cornuta, stenopetala) (18), this species shows the most interesting diversity of floral traits, fantastical flowers are produced on straight stems, petals are very elegant of longish and wiry habit, colour primrose-yellow suffused scarlet, a magnificent species which can be strongly recommended to all collectors of hardy bulbs (see illustration opposite page 40). **\$ 1.70 per doz.; \$ 12.00 per 100**

Artist (10), here is a rare member of the Tulip genus with flowers of a very unusual colour combination of terra-cotta and green, passing entirely green as flower ages, extremely long lasting, of much interest to Tulip collectors. **50 cts. each; \$ 5.00 per doz.**

Batalini (6), a very charming species, producing in April dainty flowers of magnificent form and distinct colour, being a soft chrome-yellow with deeper yellow centre, a magnificent companion to *Linifolia*, as beautiful as it is rare. **45 cts. each; \$ 4.50 per doz.**

Biflora (8), a pretty little species from the Altai Mountains, bearing on branching stems cream-coloured flowers shaded outside purplish rose and green, flowering in March. **85 cts. per doz.; \$ 6.00 per 100**

Clusiana (The Lady Tulip) (12), a charming little gem, sometimes called Candlestick Tulip, outer petals cherry red, with inner petals white, violet base, plant in a warm and sheltered position (see illustration opposite page 40). **\$ 1.05 per doz.; \$ 7.50 per 100**

Cretica (4), nearly white, tinged pink with a dull yellow stain as basal blotch, yellow anthers, early April flowering, very scarce. **\$ 1.75 per 3; \$ 6.50 per doz.**

Eichleri (Turkestan) (12), a very beautiful species with fairly large flowers of a lovely, crimson-scarlet colour and a glistening black base, golden margined. **70 cts. per doz.; \$ 5.00 per 100**

Eichleri Max (13), an improved form with extra large crimson-scarlet flowers, very fine. **\$ 1.70 per doz.; \$ 12.00 per 100**

Greigii (Turkestan) (9), beautiful glowing vermilion-scarlet, with yellow base having large maroon-black blotches, beautiful brown spotted foliage. **\$ 1.00 each; \$ 10.00 per doz.**

Hageri (8), very attractive little globular flowers of dark crimson-scarlet, outside shaded copper-red with black base, flowers are produced in great profusion (several flowers on one stem) and are exceedingly dainty, a real treasure for the rock-garden. **\$ 1.10 per doz.; \$ 7.50 per 100**

Kolpakowskyana (6), yellow, outer petals red, now very rare. **\$ 2.15 per doz.; \$ 15.00 per 100**

Linifolia (8), A.M., R.H.S., one of the most beautiful and dainty species for the rock-garden, native of Darwas in Eastern Bokhara, flowering in April, it has glowing scarlet cupshaped flowers with a conspicuous black centre also very charming for any choice spot in the garden, strongly recommended. **45 cts. each; \$ 4.50 per doz.**

Marjolettii (18), producing pretty little flowers of creamy-white flaked with pink, very fine for cutting. **85 cts. per doz.; \$ 6.00 per 100**

Maximowiczii (8), also from the Bokhara, very much like *Tulipa linifolia* with the same scarlet flowers, but with different foliage, flowering about ten days earlier. **65 cts. each; \$ 6.50 per doz.**

Orphanidea (9), an interesting species, flowering in late April; it has the unusual but attractive combination of buff-orange, shaded bronze-green and yellow at base, while the pretty flowers show the grace of line and the slender beauty of that conventional Tulip, immortalized on the tiles of Kutahia in Greece. **\$ 2.15 per doz.; \$ 15.00 per 100**

persica (Breyniana) (8), a very beautiful little dwarf species, producing several flowers on branched stems, interior of fragrant flowers brilliant yellow, exterior golden-bronze, very valuable for the rock-garden. \$ 1.70 per doz.; \$ 12.00 per 100

praecox (20), an interesting species from Asia-Minor and around the Mediterranean, a rather robust dull scarlet flower with reflexing, pointed outer petals and broadly rounded inner petals, deep olive base broad yellow margin and yellow and black on the back, carried on a stout stem, of no decorative value.

\$ 1.45 per doz.; \$ 10.00 per 100

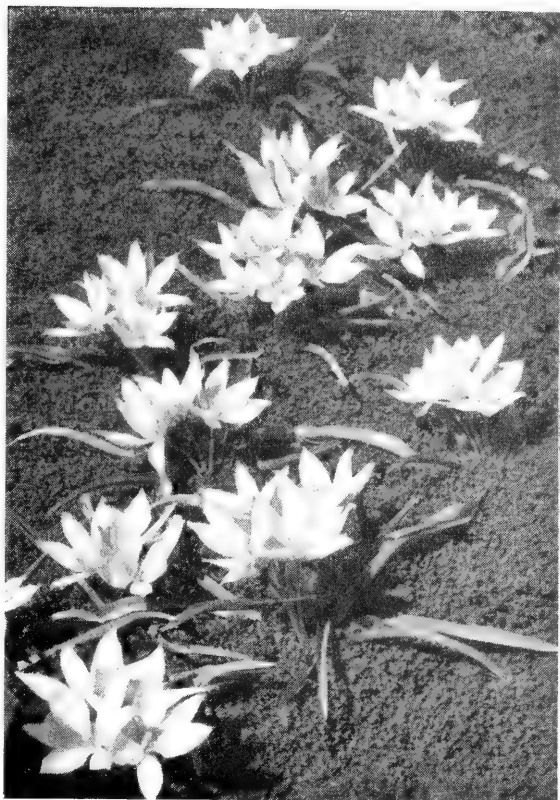

praestans (suaveolens sylvestris) (Bo-khara) (7), this is a very interesting variety which we can strongly recommend, it produces 3 to 4 flowers on a stem and its colour is of the loveliest orange-scarlet imaginable, flowers in early April.

\$ 1.40 per doz.; \$ 9.75 per 100

praestans Fusilier (10), another beautiful species worthy of a prominent position in any rockery, a brilliant orange-scarlet dwarf growing variety, producing 4 to 6 flowers on each stem, rising out of luscious dark green leaves, fine as a potplant in the Alpine house.

\$ 2.60 per doz.; \$ 18.00 per 100

praestans Zwanenburg (10), expanded vermilion blossoms with pointed segments, somewhat resembling a miniature Poinsettia. \$ 1.70 per doz.; \$ 12.00 per 100

tarda

pulchella humilis (4), a very rare and beautiful species, which always attracts much attention when flowering in the early days of Spring; it grows with Crocus-like flowers of a pretty violet pink shade and a very large and distinct yellow base, giving a splendid account of itself in the rock-garden or other choice spots in the garden.

50 cts. each; \$ 5.00 per doz.

pulchella violacea (Violet Queen) (4), a species of great beauty, flowers are cup-shaped of a reddish-purple colour, carried on a slender stem and of great lasting qualities, truly a charming little Tulip, unequalled in colour and is the first to bloom, usually in February.

60 cts. each; \$ 6.00 per doz.

saxatilis (12), a very interesting and distinct species with graceful flowers of a delicate satin-pink colour, large yellow base, may be successfully planted in a sunny position of the rockery, it is advised to place stones about 3 inches underneath the bulbs.

\$ 1.40 per doz.; \$ 9.75 per 100

sylvestris (florentine odorata) (10), the sweet scented wild English Tulip, their fragrance is like that of violets, colour beautiful rich pure yellow, elegant flowers which open very wide in full sun; must become established before flowering freely, rapid increaser.

85 cts. per doz.; \$ 6.00 per 100

sylvestris major (18), a free flowering garden form of this species bearing 2 to 3 large golden-yellow flowers on a graceful slender stem.

\$ 1.15 per doz.; \$ 8.00 per 100

sylvestris Tabris (10), a very beautiful species from Persia, it is an enlarged form of sylvestris of very free flowering and upright habit.

\$ 1.40 per doz.; \$ 10.00 per 100

tarda (dasystemon) (5), one of the most desirable Tulips for the rock-garden, producing a lovely bunch of 3 to 6 delightful star-shaped flowers standing gracefully out of the spreading foliage, outer segments tinged with green, interior soft yellow emerging into white at end of petals, truly a most charming species (see illustration).

\$ 1.70 per doz.; \$ 12.00 per 100

turkestanica (8), this interesting species is closely allied to Tulipa biflora, but is much more robust in habit and has 5 to 9 flowers on a stem, creamy white flowers with a green and bronzy flush on the exterior and has great lasting qualities.

Wilsoniana (9), a rare and very little known species from Turkestan with handsome dark vermilion-scarlet flowers with conspicuous yellow stamens.

\$ 1.00 each; \$ 10.00 per doz.

Daffodils and Narcissi

The beauty of Daffodils and Narcissi is unquestioned and these flowers now form a leading feature in almost every Spring garden. Every Gardener should realize the enormous amount of intense pleasure that can so easily be obtained from the cultivation of a batch of Daffodils or Narcissi.

Indication and origin of the name Daffodil and Narcissus. The use of the terms Narcissus and Daffodils is being confused a great many times. There is a tendency to apply "Daffodil" to varieties of which the trumpet or cup is as large or larger than the perianth, while the name Narcissus indicates varieties having small cups. The term Narcissus however, is correct for all different types of Daffodils and Narcissi. The name Daffodil is from an interesting origin. In the fifteenth century, the words affadile and affodylle applied for asphodel, a Narcissus with a large cup. In 1538 Turner writes about affadyll and daffadilly. Ten years later he says in his "Names of Herbes" that an English whyte affodil is a Duche Daffodil. He uses the forms affodil and daffodil in 1551. The name Daffodil was then used by Gerarde, when he used this term in his Herbal.

Other forms of Daffodil have been: aphrodillus, affodillus, daffodilly, daffadyl, affodyll, daffodyll, pseudo-narcissus and bastarde-narcissus.

The origin of the term Narcissus has not been connected with so much variance. It is accepted that the name has been deduced from the Greek verb Narkao (Lat. obtorpesco), which means to narcotize, as the flower was considered to do so. There is also a Greek mythe that accounts for the name, in which Narkissos is the chief character.

Naturalizing Daffodils and Narcissi in Grass etc. All Daffodils and Narcissi are suitable for naturalizing but in very heavy soils, preference should be given to stronger growing sorts e.i. Trumpet varieties and many Large Cupped sorts. They are all admirably adaptable for grassy slopes and banks, where they should be freely planted. A splendid effect is obtained when Trumpet and other varieties are grouped separately, scattered on the ground and planted where they fall.

Soil and its Treatment. Daffodils and Narcissi will thrive in any well cultivated and drained garden soil. In preparing the ground for planting, dig deeply and if well rotted stable or cow manure is available this may advantageously be dug in 18 to 20 inches deep so as not to come into immediate contact with the bulbs. Never use fresh manure of any kind at planting time. On poor and dry sandy soils we recommend a dressing of sulphate of potash at a rate of about 1 oz. per square yard to be sprinkled over the surface of the ground after planting.

Growing Daffodils in the greenhouse or indoors. All types of Daffodils and Narcissi are suitable for this purpose. Pot up the bulbs on arrival and if ordinary pots are used take a good loamy soil, adding sufficient sand and peat to keep the mixture open. A light dusting of bone meal is also useful. Pot firmly in well crocked pots. For bowls without drainage holes use a good fibre. Plunge the pots and/or bowls in the coolest place of your garden and in the absence of garden space the pots may be placed in a cool cellar (35–40° F.) where watering from time to time is necessary. When the shoots are about 4 inches long and the flower buds well out of the neck of the bulbs, the pots may be removed into a warm room. Heat should be gradually increased from 50° to max. 60° F.

It is advisable to remove the foliage of the sideshoots, if these do not show a flower bud. Just before the buds are open, water can be spread lightly, when they are in bloom less water should be applied.

Revision of the Classification of Daffodils. In this catalogue we have adopted the revised system for the new R.H.S. classification of Daffodils and Narcissi formally approved by the General Bulb Growers Society of Haarlem (Holland) and the Daffodil Societies of America, Canada, Australia, Tasmania and New Zealand.

The principal changes on comparing the old system with the new one are as follows:

The former Leedsii, Incomparabilis and Barrii Divisions are transferred into two Divisions: viz. Division II Large-Cupped Narcissi with its sub-divisions a, b, c, d and Division III Small-Cupped Narcissi with its sub-divisions a, b, c and d.

The whole Genus is now classified in eleven Divisions as follows:

Ia. Yellow Trumpets – Ib. Bicolor Trumpets – Ic. White Trumpets – IIa. Large-Cupped, yellow perianth, coloured cup or corona – IIb. Large-Cupped, white perianth, coloured cup or corona – IIc. Large-Cupped, white perianth, white cup or corona – IId. Large-Cupped, not falling in a, b, or c. – IIIa. Small-Cupped, yellow perianth, coloured cup or corona – IIIb. Small-Cupped, white perianth, coloured cup or corona – IIIc. Small-Cupped, white perianth, white cup or corona – IIId. Small-Cupped, not falling in a, b, or c – IV. Double varieties – V. Triandrus Narcissi – VI. Cyclamineus Narcissi – VII. Jonquilla Narcissi – VIII. Tazetta Hybrids (Poetaz etc.) – IX. Poeticus Narcissi – X. Species and Wild forms and Hybrids – XI. Miscellaneous Narcissi not falling into any of the foregoing Divisions.

New and Rare Daffodils

We offer the following list of very choice and rare Daffodils and Narcissi, which should be of special interest to the Connoisseurs. The Bulbs offered are top sized and orders should reach us as early as possible, not later than the 15th of September, after which date we replant our stock. The earlier these Bulbs are planted the better it is, while this importance is of equal interest to Purchasers.

Amateur (Small-Cupped 3b), A.M., Haarlem 1943, a splendid flower with immense thick very broad snow-white perianth and a flat expanding orange crown, the perfect balance of the flower makes it very attractive, strong grower. **40 cts. each; \$ 4.00 per doz.**

Ardclinis (White Trumpet 1c), one of the very finest White-Trumpets up to date, a large flower of most perfect form, balance, quality and fine carriage, broad smooth flat perianth and perfectly proportioned neatly flanged trumpet of clear white throughout of very durable substance and fine waxy texture, thrives well. **50 cts. each; \$ 5.00 per doz.**

Armada (Large-Cupped 2a), F.C.C., R.H.S. 1947, an outstanding and magnificent novelty raised by Mr. Guy L. Wilson and caused a real sensation, a well posed $4\frac{1}{2}$ in. in diameter flower with smooth, broad much overlapping intense deep yellow perianth and deep tangerine red-orange cup-shaped crown, 1 in. long and about $1\frac{1}{2}$ in. in diameter at its frilled and expanded mouth, truly a most striking and early flower, vigorous grower. **\$ 7.00 each**

Bahram (Large-Cupped 2a), A.M., R.H.S. and Haarlem, in our opinion one of the finest yellow-red flowers up to date, flowers are of large size and perfect form, shortnecked on strong stems, flowers having broad smooth wide-spread, rich clear yellow perianth and perfectly proportioned rather shallow intense vivid deep orange-red crown, finely frilled at edge. **40 cts. each; \$ 4.00 per doz.**

Bastion (Yellow-Trumpet 1a), A.M., R.H.S. and Midland Daffodil Society 1946, a late flowering deep self-golden trumpet of fine quality and substance, having very broad flat smooth perianth standing at right angles to the rather long straight-sided trumpet, shortnecked on a stout stem, vigorous grower with very broad foliage, first rate for exhibition. **\$ 1.00 each; \$ 10.00 per doz.**

Beecher Stowe (Small-Cupped 3b), a very fine large flower of purest white throughout, with broad rounded, flat perianth and a vivid orange-red crown, a flower of great beauty and refinement, an excellent show-flower. **70 cts. each; \$ 7.00 per doz.**

Belisana (Large-Cupped 2b), in our opinion the largest 2b yet in cultivation producing flowers of enormous size, pure white well proportioned perianth with gigantic expanding flat yellow crown with appealing frilled orange edge, attracted much attention when showed. **\$ 10.00 each**

Bergen (White Trumpet 1c), F.C.C. Haarlem 1950, a beautiful white trumpet with broad shovel-pointed perianth of fine quality and a rather straight trumpet slightly flanged at mouth, very fine for exhibition. **85 cts. each; \$ 8.50 per doz.**

Bermuda (Large Cupped 2a), F.C.C., Haarlem 1944, very large overlapping and smooth soft yellow perianth and a large spreading crown of clear orange, an immense flower of fine form and substance, early flowering. **80 cts. each; \$ 8.00 per doz.**

Binkie (Reversed Bicolor 2d), a curious and most distinct attractive variety, flowers are of excellent form, balance and fine substance, having broad flat-pointed perianth and a well-proportioned crown. On first opening the whole flower is a most pleasant clear sulphur-lemon, but the crown gradually passes to almost pure white. **\$ 1.75 each; \$ 17.50 per doz.**

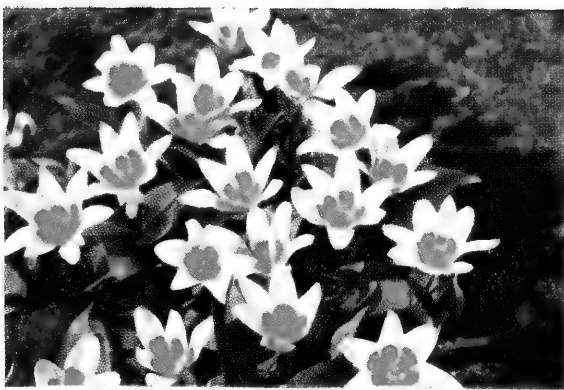

Bizerta (Large-Cupped 2b), A.M., R.H.S., 1947, and Haarlem 1949, a show flower similar to Polindra, but of unusual and distinct colouring, pure white thick perianth, cup rich apricot chrome with slightly paler frill at mouth, while the flower has great lasting qualities. **\$ 1.50 each**

Blarney (Small-Cupped 3b), none to offer this season.

Broughshane (White Trumpet 1c), A.M., R.H.S. and Haarlem 1948, a glorious giant white Trumpet of perfect form and balance, the noble trumpet being widely flanged, reflexed and frilled, does not overbalance, the immense perianth, which is fully $5\frac{1}{2}$ inches in diameter, the outer segments being up to $2\frac{1}{2}$ inches wide, the great flower, which is of immense substance and quite exceptionally durable, is carried on a strong stem well over 2 feet high and has very broad foliage. **\$ 4.25 each**

Buncrana (Large-Cupped 2b), A.M., R.H.S. 1942, a most distinct and beautiful first-class show flower, having very broad flat pure white shovel-shaped segments and a beautifully proportioned longish frilled cup of unusual deep peachy-orange shade. **\$ 1.00 each**

- Cantatrice** (White Trumpet 1c), F.C.C., R.H.S. 1939, this variety has scored a remarkable triumph at the various flower shows all over the world and leads the field for grace and beauty of form. A flower of a most exquisite quality and smooth texture, cleancut pointed even perianth standing out sharply from the well-balanced perfectly smooth rather slender trumpet, absolutely pure clear-white throughout, a perfect beauty. **\$ 1.75 each**
- Carnlough** (Large-Cupped 2c), a distinct flower of strong sturdy habit, fine size and superb quality, broad firm flat pure white perianth; on first opening the crown is faintest citron with a frill of soft coral-pink; in time the entire flower passes to purest white throughout, exceptionally durable. **40 cts. each; \$ 4.00 per doz.**
- Ceylon** (Large-Cupped 2a), F.C.C., R.H.S. 1948, one of the most magnificent coloured red and yellow flowers seen up to date, a flower of beautiful form and proportion, with broad smooth shovel-pointed overlapping perianth of deep intense aureolin gold that has an almost metallic sheen and a goffered goblet-shaped crown of dark, clear intense cadmium orange-red, quite sun proof, tall robust plant. **\$ 12.00 each**
- Chamois Beauty** (Large-Cupped 2b), a remarkable variety with pure white perianth of splendid form and substance, the small white cup is edged soft chamois, very dainty. **\$ 3.00 each**
- Cherie** (Jonquilla 7), a most unusual and charming hybrid, having an ivory-white perianth with a small cup, distinctly flushed pale shell-pink. One to three smallish flowers on each stem, very exquisite. **80 cts. each; \$ 8.00 per doz.**
- Chinese White** (Small-Cupped 3c), A.M., R.H.S. and Haarlem 1948, this is a very large flower of quite faultless form and quality, pure-white throughout except for a point touch of green in the eye, perfectly proportioned shallow-fluted saucer crown, a superb show flower, quite unique, strong plant. **\$ 4.50 each**
- Chungking** (Small-Cupped 3a), A.M., Haarlem 1948, a gorgeous and magnificent Small-Cupped variety, a large tall-stemmed very circular flower, having broad, smooth, clear yellow perianth and an intense deep vivid red shallow crown. (See illustration page 41). **\$ 1.00 each; \$ 10.00 per doz.**
- Content** (Bicolor Trumpet 1b), A.M., R.H.S. 1940, a very large and quite unique trumpet after the style of Beersheba, but larger and much taller, the noble perianth is built of broad long flat petals, of a fine smooth quality and substance. When first opening it is a uniform tone of lovely soft greenish primrose throughout, gradually passing to a very pale lemon-white all over, except the brim of the long graceful trumpet, which retains a dainty frill of lemon, very vigorous grower. **\$ 1.25 each; \$ 12.50 per doz.**
- Coverack Perfection** (Large-Cupped 2b), A.M., R.H.S. 1934, a unique flower of outstanding charm, broad overlapping rather pointed perianth, large wide shallow saucer crown, edged and flushed pale gold and salmon, has a faint tinge of green behind the anthers, very tall and of most intense golden-yellow throughout. **70 cts. each; \$ 7.00 per doz.**
- Crocus** (Large-Cupped 2a), F.C.C., R.H.S., A.M. Birmingham, a very striking flower which might almost be classed as a trumpet, broad perianth and well flanged trumpet of great substance and of most intense golden-yellow throughout (see illustration opposite page 41). **40 cts. each; \$ 4.00 per doz.**
- Cromarty** (Yellow Trumpet 1a), A.M., R.H.S. 1938, this trumpet of faultless form and beautiful quality has broad smooth flat perianth standing at right angles to the neatly flanged and serrated trumpet, ideal garden plant of great lasting power, moreover a perfect exhibition flower of faultless form, finish and colour. **40 cts. each; \$ 4.00 per doz.**
- Cushendall** (Small-cupped 3c), A.M., R.H.S. 1936, this is in our opinion the best green-eyed flower under cultivation; it is of faultless form, quality and splendid substance, broad smooth circular overlapping perianth of purest sparkling poetic white, very shallow saucer crown edged with a deliciously cream-coloured frill, the whole centre is of a lovely moss-green. **\$ 1.25 each**
- Decor (Decoration)** (Large-Cupped 2a), F.C.C., Haarlem 1944, a very large yellow perianth of great substance; the beautiful, very heavily frilled, bowl-shaped crown is bright orange, ideal garden plant and show flower. **70 cts. each; \$ 7.00 per doz.**
- Dominator** (Yellow Trumpet 1a), A.M. Haarlem 1948, a real giant among the trumpets and a wonderful Daffodil in size and substance, balance and proportion, having broad, thick overlapping perianth of deep golden yellow with large serrated golden yellow trumpet, a magnificent flower for the garden and exhibition. **\$ 1.75 each**
- Duke of Windsor** (Large-Cupped 2b), F.C.C., Haarlem 1938, one of the choicest John Evelyn seedlings, thick pure white segments with a broad flat cup beautifully ruffled, of lovely orange-red, becoming a lovely pale yellow as the flower ages, a charming garden plant. **50 cts. each; \$ 5.00 per doz.**

Dunkeld (Large-Cupped 2a), a magnificent well-formed flower having broad smooth circular clear yellow perianth of fine substance and shallow expanded vivid orange-scarlet crown; immensely vigorous and free flowering, thrives well in the cold greenhouse. **45 cts.** each; **\$ 4.50** per doz.

Dunlewey (Large-Cupped 2c), A.M., R.H.S. 1938, a fine large flower of perfect form and quality, broad smooth pure white perianth with large creamy cup, rather short in stem but its amazing freedom to bloom makes it a splendid garden plant. **35 cts.** each; **\$ 3.50** per doz.

Dutch Master (Yellow Trumpet 1a), a rich golden-yellow trumpet of a remarkable refined form, broad overlapping perianth with a deeply serrated large trumpet, a vigorous grower, excellent forcer and fine show flower.

\$ 1.00 each; **\$ 10.00** per doz.

Fermoy (Large-Cupped 2b), a magnificent flower of great size and fine quality, with very large pure white perianth and well proportioned beautifully frilled bowl-shaped crown, bright orange-red at the mouth shading to gold in the base, very vigorous plant. **60 cts.** each; **\$ 6.00** per doz.

Narcissus Chungking

Fleurimont (Large-Cupped 2a), a distinct and richly coloured flower having broad smooth clear yellow perianth of great substance and a beautifully frilled crown with vivid orange-red band. A wonderful flower with rich colour effect. **\$ 6.00** each

Forest Fire (Large-Cupped 2a), this is a remarkably fine showy free-flowering red and yellow that is perhaps best described as a larger and better Porthilly with almost sunproof colour on account of which it is a fine garden plant, it comes in first class form and colour under cold glass, vigorous grower. **\$ 1.00** each

Frigid (Small-Cupped 3b), one of the very latest to bloom in May, broad smooth pointed perianth measuring about 4 inches in diameter with smallish fluted almost flat crown, the whole flower is purest icy white throughout except for a most lovely vivid emerald-eye, good stem, free flowering and vigorous grower. **\$ 2.50** each

Galway (Large-Cupped 2a), A.M., R.H.S. 1942, this is a magnificent tall strong-stemmed intense self golden flower, bordering on trumpet proportions, broad smooth perianth, well flanged trumpet crown; it is a glorious garden plant owing to its splendid size, proportion, stature and colour, also excellent for exhibition. **\$ 4.00** each

Garland (Large-Cupped 2a), F.C.C. Haarlem 1930, a splendid large shallow crowned flower, the clear yellow perianth is of smooth waxen texture, the three outer petals are actually broader than their length and overlap each other, large expanded shallow crown of dark rich orange shading to gold in the centre, a most striking exhibition variety. **\$ 1.00** each

Garron (Yellow Trumpet 1a), A.M. Wisley Trials 1946, a magnificent refined flower of unusual quality and size, it has a great long pointed and slightly waved perianth of smoothest velvety texture and thick substance, trumpet nicely serrated, of beautiful deep clear primrose or soft full self lemon, enormously vigorous and grand garden plant. **50 cts.** each; **\$ 5.00** per doz.

Glorification (Large-Cupped 2a), a very attractive flower of brilliant colour with well-formed flat perianth of the purest white and a large saucer shaped, clear yellow crown with a broad ribbon edge of soft orange. Tall, strong grower and excellent show flower. **50 cts.** each; **\$ 5.00** per doz.

Golden Castle (Double 4), an exquisite flower of perfectly beautiful form and finest quality; the colour is of the deepest golden-yellow throughout. A first-class double variety, free bloomer and reliable grower. **\$ 1.75** each

Goldcourt (Yellow Trumpet 1a), F.C.C., R.H.S. 1947, a perfectly formed trumpet of good substance and beauty; flat, smooth overlapping pointed segments and well balanced not overwide trumpet of pure maximus gold throughout. **\$ 1.00** each

- Golden Ducat** (Double 4), A.M. 1950, this sport of the well-known daffodil King Alfred is a fine, fully double variety, of which the larger segments are canary-yellow and the smaller segments, interspersed between the larger, are Aureolin yellow, outstanding for exhibition. Strong grower. **\$ 8.00 each**
- Golden Torch** (Large-Cupped 2a), A.M., R.H.S. 1947, an exquisite rich golden flower of grand quality, perfect form and proportion, shortnecked and nicely posed on a tall strong stem, broad, smooth, flat clear rich golden-yellow perianth and a well balanced frilled flanged crown of slightly deeper and more intense gold. **\$ 2.75 each**
- Grape Fruit** (Yellow Trumpet 1a), F.C.C. Haarlem 1944, this is a handsome flower of great beauty and distinct colouring, large well-shaped trumpet with broad thick much overlapping perianth, colour a pale lemon throughout, the whole flower slightly deepening to a very soft greenish lemon as it ages. **\$ 1.00 each; \$ 10.00 per doz.**
- Green Island** (Large-Cupped 2b), A.M., R.H.S. 1946, a sensational flower of very large size, great substance and waxy smooth texture. Smooth rounded white segments of such immense width that they form an almost complete circle. Well proportioned shallow bowl-shaped frilled cup, greenish white at the inside base, passing to white, which in turn passes to a band of clear cool greenish lemon at margin. Shortnecked on a tall strong stem. Plant of great vigour. **\$ 3.00 each**
- Hardy** (Small-Cupped 3b), a very unique and really attractive flower with flat smooth much overlapping creamy-white perianth of splendid quality and heavy durable texture, the orange-red crown is semi-double and heavily frilled (see illustration opposite page 57). **30 cts. each; \$ 3.00 per doz.**
- Hollandia** (Double 4), A.M. Haarlem 1943, a most attractive flower somewhat after the style of "Swansdown" thus entirely distinct from other double Narcissus, having broad deep yellow overlapping outer segments and a very full double orange cup, good grower. **60 cts. each; \$ 6.00 per doz.**
- Hollywood** (Large-Cupped 2a), a fine and noble flower which might best be described as an improved Fortune, large, much overlapping and flat deep golden yellow perianth, the large trumpet-shaped crown is clear orange, early flowering and vigorous grower. **70 cts. each; \$ 7.00 per doz.**
- Hunter's Moon** (Yellow Trumpet 1a), R.H.S. 1943, a lovely flower of unique colouring, being clear shining, cool greenish lemon-yellow, most intense at the outer edge of the beautifully flanged and serrated trumpet, a very decorative flower. **\$ 1.25 each**
- Indian Summer** (Large-Cupped 2a), A.M. Haarlem 1948, this variety has a broad very smooth perianth of great substance, which colour is of a very deep intense golden yellow, while the nicely proportioned rather shallow cup is deep orange-scarlet; tall stem. **\$ 1.00 each**
- Jules Verne** (Large-Cupped 2c), a new and exquisite variety of superb quality, finish, substance and texture, very broad well overlapping pure white perianth with large, neatly flanged trumpet-shaped white cup with a pleasing soft creamy yellow band, a real outstanding variety as a show flower and for the garden. **50 cts. each; \$ 5.00 per doz.**
- Kanchenjunga** (White Trumpet 1c), A.M., R.H.S. 1940, an immense flower with the biggest and broadest perianth segments yet seen, forming an almost perfect circle and a magnificent widely flanged and serrated trumpet of palest lemon passing to white, perianth pure white, a noble flower of stately carriage. **\$ 1.25 each**
- Killaloe** (Large-Cupped 2c), A.M., R.H.S. 1948, a most striking immense pure white flower of grand quality, very broad, flat, pointed perianth of fine substance, the large cup is widely expanded beautifully flanged and frilled at mouth, strong grower. **\$ 3.50 each**
- Kilworth** (Large-Cupped 2b), F.C.C., R.H.S., an outstanding variety, large flower with broadly overlapping white perianth and perfectly proportioned bowl-shaped crown of intense dark orange-red with a touch of dark green in the eye, sunproof, one of the best varieties in the red and white class, vigorous grower. **60 cts. each; \$ 6.00 per doz.**
- Kingscourt** (Yellow Trumpet 1a), F.C.C., R.H.S. 1947, a large flower of faultless form, of superb quality and uniform intense deep golden colour, flat velvet smooth perianth of immense breadth and noble perfectly balanced bell-mouthed trumpet, strong stem, fine sturdy plant. **\$ 1.75 each**
- Limerick** (Small-Cupped 3b), F.C.C., R.H.S. 1946, one of the best of this class, a lovely flower with broad pure white overlapping perianth, and large absolutely flat eye of intense dark cherry-red, a wonderful combination of colour. **80 cts. each; \$ 8.00 per doz.**
- Ludlow** (Large-Cupped 2c), undoubtedly one of the finest varieties in this section yet raised, a perfect show flower of moderate size and faultless form having broad flat perianth of solid texture, which stands at right angles to the well-proportioned trumpet shaped crown, the flower is purest icy-white throughout, a very beautiful flower of perfect finish and graceful appearance. **\$ 1.50 each**

- Magherally** (Large-Cupped 2a), a smallish but tall stemmed flower of magnificent brilliant colour, having golden perianth and neat almost ruby-red cup, attracted considerable comment at the 1943 London Daffodil Show. **60 cts.** each; \$ **6.00** per doz.
- Magic Circle** (Large-Cupped 2b), A.M. Haarlem 1946, a well overlapping and flat pure white perianth, the large and very flat golden-yellow crown is broadly margined bright scarlet, very distinct, and a novelty of great beauty. **70 cts.** each; \$ **7.00** per doz.

Pink Select (2b), another fine pink novelty, opening pale yellow, but quickly turning to a lovely apricot-pink when fully developed, producing a long trumpet and well-formed, pure white perianth, flowers are held on strong stems. **50 cts. each; \$ 1.25 per 3**

Rosario (2b), a most charming flower of nearly trumpet character and measurements, having broad smooth pure white perianth, the trumpet-shaped crown which is gracefully flanged and frilled is of very pale soft primrose shell-pink, in good season it becomes almost entirely pink. **\$ 6.00 each**

Rose of Tralee (2b), A.M. Haarlem 1950, this remarkable flower is of beautiful form and quality, having pure white perianth, pointed at the tips, long nicely flanged crown, of rosy apricot-pink right down to the base passing off white before the flower dies. **\$ 1.50 each**

Rosy Sunrise (2b), F.C.C. Haarlem 1943, this lovely variety with its trumpet shaped cup can be described as one of the most beautiful of the pink varieties, the perianth is of a primrose white, while its cup is creamy yellow with a heavily frilled very delicate apricot-rose edge. **\$ 1.00 each; \$ 2.75 per 3**

Siam (2b), pure white perianth, wellformed and of good substance, wide expanding frilled cup, apricot-tinted changing into soft pink, a most attractive and striking fragrant flower, carried on a strong stem. **50 cts. each; \$ 1.25 per 3**

Topic (2b), this is a really vigorous pinky crowned flower and a first rate garden plant, broad white perianth and large almost trumpet-shaped crown well flushed with pink, a valuable introduction. **75 cts. each; \$ 7.50 per doz.**

TOSCANINI (2b), **a beautiful variety of great distinction and noble form, broad pure white, much overlapping perianth of splendid substance, the ivory-white crown with a broad apricot-pink band gives the nicely proportioned flower a very distinguished appearance, a very fine garden and exhibition variety.**
\$ 2.00 per doz.; \$ 14.00 per 100

Wild Rose (2b), P.C., 1946, R.H.S., this is a real advance in pink colouring as the cup is a quite definite rosy-pink to the base, the colour being in the main retained, till the flower dies. The pinkest cup yet raised, not a large flower but of pleasing form. Attractive novelty. **\$ 1.75 each; \$ 4.90 per 3**

AWARDS TO MERITORIOUS VARIETIES OF DAFFODILS AND NARCISSI

We thought it worth while to record particulars of awards which have been made to meritorious varieties of Daffodils and Narcissi. In this connection the following abbreviations are used:

F.C.C. – First Class Certificate.

A.M. – Award of Merit.

P.C. – Preliminary Commendation.

R.H.S. – Awarded by the Royal Horticultural Society, London, England.

Midland – Awarded by the Midland Daffodil Society, Birmingham, England.

Haarlem – Awarded by the General Bulb Growers Society, Haarlem, Holland.

Division I - Trumpet Narcissi

Distinguishing characters: One flower to a stem; Trumpet or Corona as long as, or longer than the Perianth segments

DIVISION IA - YELLOW TRUMPETS

Yellow and Sulphur-coloured Trumpet Narcissi

Aerolite (19), a very fine bold flower of good poise and carriage, perianth deep primrose with a slightly deeper yellow trumpet, extremely long lasting and a fine garden plant or for cutting.

\$ 2.00 per doz.; \$ 14.00 per 100

BURGEMEESTER GOUVERNEUR (22), F.C.C. Haarlem, a very large and beautiful flower, colour self-yellow throughout, perianth flat and broadly overlapping, while the large smooth trumpet is slightly rolled back at rim, a noble Daffodil which we can especially recommend.

\$ 2.60 per doz.; \$ 18.00 per 100

Emperor (20), deep golden yellow trumpet with broad, primrose perianth, of robust growth, should be planted in generous quantities in beds and borders, and naturalized in grass, etc.

\$ 1.85 per doz.; \$ 13.00 per 100

Flower Carpet (20), this new introduction may be described as an improved King Alfred, it gives more flowers per bulb. It produces a perfectly formed golden yellow flower of great substance.

\$ 2.60 per doz.; \$ 18.00 per 100

Magnificence (20), F.C.C., R.H.S., the first yellow trumpet out, a very large deep golden yellow flower, gracefully waved perianth with deeply serrated trumpet, opens much before the wellknown Golden Spur, which variety we have now superseded. "Magnificence" produces a wealth of blossom and is very desirable for the garden as well as for forcing.

\$ 2.15 per doz.; \$ 15.00 per 100

Rembrandt (19), a very early large golden-yellow trumpet of lovely carriage, petals are flat, broad and somewhat pointed and has a huge expanded trumpet, which is nicely flanged at mouth, a vigorous grower, excellent for pots, a showy and decorative garden variety (see illustration page 49).

\$ 1.85 per doz.; \$ 13.00 per 100

UNSURPASSABLE (23), F.C.C. Haarlem, this is one of the most impressive and largest yellow trumpet Daffodils in cultivating, producing colossal flowers of deepest golden yellow throughout and noble proportions, a fine show flower, good forcer and a magnificent variety for the garden.

\$ 2.70 per doz.; \$ 19.00 per 100

Winter Gold (18), A.M. for garden 1935, a very early variety of great garden merit, producing flowers of very elegant form in February, perianth bright yellow, trumpet long and straight of a deep golden-yellow prettily frilled at mouth, it forces as early as the old Golden Spur, but is of much better form and colour.

- Magnet** (16), an interesting bold flower, pale cream perianth, colour of the deep golden-yellow trumpet runs into the perianth. \$ 2.00 per doz.; \$ 14.00 per 100
- Music Hall** (18), a handsome early Bicolor of good form, producing a magnificent, large well proportioned flower with pure white perianth and golden yellow nicely flanged trumpet (see illustration opposite page 41). \$ 2.30 per doz.; \$ 16.00 per 100
- Patria** (18), A.M., Haarlem, a very fine Bicolor Trumpet, deep yellow trumpet and pure white perianth, large flower of noble form, splendid all-round variety for garden, pots and show purposes, amazingly beautiful. \$ 2.90 per doz.; \$ 20.00 per 100
- President Lebrun** (18), a noble flower, with large flat, much overlapping white perianth and a creamy-yellow trumpet, very solid flower, recommended for the garden and late forcing. \$ 2.50 per doz.; \$ 17.50 per 100
- Queen of the Bicolors** (18), this is one of the best garden varieties, doing justice to its name as one of the loveliest Bicolors, pure white overlapping perianth with canary-yellow trumpet of good form and proportions, a very vigorous grower. \$ 2.30 per doz.; \$ 16.00 per 100
- Spring Glory** (16), several good merits united in this variety cause it to be a remarkable acquisition; it has a pure white perianth with a deep golden yellow trumpet which is artistically recurved at mouth; the large fragrant flowers are produced early in an unusual abundance and are of a splendid substance, altogether a variety with outstanding qualities. \$ 2.00 per doz.; \$ 14.00 per 100

DIVISION IC - WHITE TRUMPETS

White or Whitish Perianth with White or nearly White Trumpet

Beersheba (18), F.C.C. Midland and R.H.S., undoubtedly one of the most beautiful and outstanding white trumpets yet raised, the large distinct flowers are pure white and of extremely perfect form with a splendid perianth, nicely flat and standing at right angles to the trumpet, the pointed segments are long and overlapping. The outstanding purity of its whiteness is striking, while its perfect beautiful lines and stately posing give it a loveliness that compels unqualified homage from all who can appreciate the true loveliness of Daffodil blooms. It has a splendid substance and grows a vigorous plant with lovely green foliage (see illustration opposite page 41).

\$ 2.60 per doz.; \$ 18.00 per 100

Mount Hood (20), a novelty of great refinement, large pure white flowers with broad smooth perianth segments of great substance, and a long pale, creamy-white well proportioned trumpet nicely rolled back at mouth, tall grower, fine for pots.

\$ 3.30 per doz.; \$ 23.00 per 100

Mrs. Ernest H. Krelage (20), snowy-white perianth with elegant creamy-white trumpet, beautiful recurving at brim, vigorous grower, flowers are of great substance, the first bulbs of this variety were sold at \$ 200.00 each, recommended.

\$ 2.00 per doz.; \$ 14.00 per 100

Mrs. R. O. Backhouse (The Pink Daffodil) see under New Pink Daffodils, page 46.

Roxana (18), F.C.C., Haarlem, a large flower of splendid form and carriage with white overlapping perianth and a beautiful broad trumpet, vigorous grower, can be forced after January 20th.

\$ 2.90 per doz.; \$ 20.00 per 100

W. P. Milner (12), (see under miniature Daffodils, page 61).

Division II - Large-Cupped Narcissi

(Comprising the former Incomparabilis and large crowned Leedsii)

Distinguishing characters: One flower to a stem; Cup or Corona more than one-third, but less than equal to the length of the perianth segments

DIVISION IIA - LARGE-CUPPED

Yellow, Lemon and Pale Primrose Perianth with yellow, pink or red-stained cups

Adventure (16), A.M., R.H.S. and Haarlem, this large perfectly formed flower is clear soft yellow throughout, has a broadly overlapping very flat perianth and a large expanding crown of almost trumpet dimension, tall and vigorous grower.

\$ 1.45 per doz.; \$ 10.00 per 100

ARANJUEZ (19), A.M., R.H.S. and F.C.C. Haarlem, this is a particular fine flower for exhibition on account of its magnificent form and posture; broad, even, smooth clear yellow overlapping perianth of great substance with an enchanting shallow expanded crown, widely margined with deep orange-red, strong grower.

\$ 1.40 per doz.; \$ 9.75 per 100

Carbineer (18), a beautiful flower of splendid carriage and great substance, having broad flat golden-yellow perianth standing at right angles to the large bright orange-red cup, a fine novelty (see illustration opposite page 49).

\$ 2.30 per doz.; \$ 16.00 per 100

Carlton (18), A.M., Haarlem, the immense flower has a broad perianth and large gracefully frilled crown, colour soft clear yellow throughout, much recommended for forcing in bowls or pans.

\$ 1.35 per doz.; \$ 9.50 per 100

Copper Bowl (17), A.M., R.H.S., and Midland, a beautiful flower of noble form with clear-yellow perianth and an expanded shallow bowl-shaped crown of glowing coppery-red, a fine garden variety.

\$ 1.70 per doz.; \$ 12.00 per 100

Damson (18), A.M., R.H.S. and Haarlem, a flower of great substance, broad overlapping creamy-white perianth, the base of the segments is suffused with yellow, the cup is long and solid deep red throughout.

\$ 1.70 per doz.; \$ 12.00 per 100

Dillenburg (19), A.M., Haarlem, a very fine garden variety, bright clear yellow perianth with large heavily frilled trumpet-shaped crown of deepest orange.

\$ 2.00 per doz.; \$ 14.00 per 100

Erie (18), this is a very charming variety of recent introduction, with broad deep coppery yellow, stained orange perianth and a fairly large deep orange crown, very distinct on account of its deep colouring.

\$ 1.45 per doz.; \$ 10.00 per 100

FORTUNE (20), F.C.C., R.H.S. and Haarlem, this variety is generally recognised as the best Daffodil of its type that has yet been produced. It has a beautiful colour of clear deep lemon-yellow and a splendid flat overlapping perianth with a very large and long bold cup of coppery red-orange, is of good substance, a two feet stem and perfect carriage. In addition to all these good merits it is very early flowering, a good grower and a free increaser, in fact it has every good point that one could wish for. \$ 1.50 per doz.; \$ 10.50 per 100

Gehema (20), A.M., Haarlem, soft yellow much overlapping perianth and a beautifully shaped chrome-yellow cup with a conspicuous orange band, flowers are of fine substance and have great lasting qualities. \$ 1.70 per doz.; \$ 12.00 per 100

Helios (18), F.C.C., Haarlem, perianth deep golden-yellow, cup opens a little darker than the petals and gradually changes to a deep orange colour, excellent for forcing and a splendid garden variety. \$ 1.35 per doz.; \$ 9.50 per 100

Invergordon (17), a most striking flower of great size with large broad rounded smooth soft yellow perianth and wide open shallow bowl-shaped crown of solid vivid deep orange-red. 40 cts. each; \$ 4.00 per doz.

Jubilant (19), A.M., R.H.S., a remarkably large flower of exceptional smoothness, quality and substance, perianth broad overlapping smooth, deep rich yellow, darker cup, beautifully expanded and serrated at mouth, flowers are well carried on long stiff stems. \$ 1.70 per doz.; \$ 12.00 per 100

Killigrew (20), F.C.C., R.H.S. and A.M., Haarlem, a very magnificent variety producing good sized refined flowers with yellow perianth, the cup which is frilled and of peculiarly attractive form and proportion, is brilliant deep rich tangerine-orange, tall strong stem and a good grower. \$ 1.40 per doz.; \$ 9.75 per 100

Lady Penrhyn (20), an enchanting flower of lovely form and carriage, deep lemon-yellow much overlapping perianth and a bold cup of a brilliant copper-red orange, this fine flower is of unusual durability (see illustration opposite page 56). \$ 2.60 per doz.; \$ 18.00 per 100

Mrs. Margaret Erskine (18), a very fine early garden variety, producing a beautiful large yellow flower with broad overlapping perianth and a large expanding yellow crown, tall, vigorous grower. \$ 1.70 per doz.; \$ 12.00 per 100

Penquite (19), deep clear yellow perianth of good breadth and substance, expanded rather shallow deep coppery orange-red cup. Flowers are held on strong stems. \$ 2.00 per doz.; \$ 14.00 per 100

PORTHILLY (16), very fine large flower with broad beautifully shaped clear yellow perianth and well-proportioned open frilled cup of intensely vivid deep solid orange-red. In our opinion one of the finest large-cupped (see illustration opposite page 48). \$ 2.00 per doz.; \$ 14.00 per 100

Redmarley (16), A.M., Haarlem, slightly pointed yellow perianth, the large and heavily fringed trumpet-shaped crown is intense orange-red throughout, a very attractive flower. 50 cts. each; \$ 5.00 per doz.

Reginald Dixon (18), a charming incomparabilis of perfect form, clear yellow, round perianth of splendid substance with a flat yellow crown, widely margined with deep orange. A very lasting flower either on the plant or when cut. \$ 2.00 per doz.; \$ 14.00 per 100

René de Chalons (18), A.M. Haarlem, a very beautiful flower of great size, broad, flat pale yellow perianth with large deep yellow nicely ruffled crown perfectly proportioned, a lovely garden plant of vigorous constitution. \$ 2.00 per doz.; \$ 14.00 per 100

Scarlet Elegance (16), one of the first to bloom in the garden and is noted for its deeply coloured scarlet crown, perianth deep yellow; very fine for cutting. Can be forced after January 15th. \$ 1.35 per doz.; \$ 9.50 per 100

Scarlet Leader (20), one of the best raised by the late Mrs. Backhouse, perianth soft creamy-white, very broad, much overlapping and perfectly flat, the large expanding flat crown is 1 to 1½ inch across, bright scarlet throughout and does not fade in the sun, very lovely flower. \$ 2.00 per doz.; \$ 14.00 per 100

Trevisky (14), a very neat well-posed flower of exceptionally smooth firm texture, perianth clear King Alfred yellow, cup deep clear red, extra strong stem, very vigorous grower. \$ 1.70 per doz.; \$ 12.00 per 100

Whiteley Gem (17), (F.C.C., R.H.S. as a flower for cutting), outstanding owing to its extreme earliness and splendid lasting qualities, a refined flower with clear-yellow perianth and large coppery-orange crown, strong grower. \$ 1.70 per doz.; \$ 12.00 per 100

DIVISION IIB - LARGE-CUPPED

White or Whitish Perianth with yellow, pink or red-stained cups

- Amiable** (16), a lovely variety on account of its high quality and refined flowers, smooth yellow perianth with a very large almost flat orange cup, a magnificent garden plant and fine for exhibition.
\$ 1.70 per doz.; \$ 12.00 per 100
- Bertha Aten** (14), A.M., Haarlem, a solid round flower with closely overlapping pure white perianth of fine smoothness and texture, expanding crown of vivid orange red, a good plant, but of rather dwarf habit.
\$ 2.00 per doz.; \$ 14.00 per 100
- Brunswick** (18), a very early variety, producing a very tall flower of perfect form, and is well posed on a tall strong graceful stem, it has a beautiful modelled flat clean-cut white perianth of very firm texture, the perfectly balanced crown is just like a short nicely flanged and frilled trumpet, clear icy-white in the base and gradually shading up to lemon at the brim. \$ 3.00 per doz.; \$ 21.00 per 100
- Caledonia** (19), (A.M. Haarlem), a handsome flower with star-shaped, creamy-white perianth and widely expanded yellow crown with a pretty, sharply defined scarlet band at margin, a flower of great substance and ideal for the garden.
\$ 1.45 per doz.; \$ 10.00 per 100
- Composer** (20), a very fine variety with broad, pure white perianth and a large bowl-shaped cup of fine lemon-yellow, distinctly edged orange, strong grower and very free flowering.
\$ 2.90 per doz.; \$ 20.00 per 100
- Criterion** (17), beautiful smooth white perianth of excellent form, the large expanded yellow crown has a narrow but very distinct edge of bright orange, tall and sturdy grower, medium late; an excellent Show flower.
\$ 1.70 per doz.; \$ 12.00 per 100
- Deanna Durbin** (17), a magnificent flower of fine form and carriage, pure white perianth with orange crown and lovely dark green upright foliage, particularly handsome variety when grown in pots, very free flowering, recommended.
\$ 1.45 per doz.; \$ 10.00 per 100
- Dick Wellband** (16), undoubtedly one of the best red and white garden varieties of this section yet introduced, also a fine show flower of good merit; a large pure white perianth with a bold expanded crown of brilliant flame-orange, one of the good merits is that its crown does not fade in the sun, but rather intensifies as the flower ages; highly recommended.
\$ 1.70 per doz.; \$ 12.00 per 100
- Duncan** (17), A.M., R.H.S., a large flower with creamy-ivory segments overlapping at base, with a large funnel shaped sulphur corona, measuring 1½ inches across, very free grower.
\$ 1.70 per doz.; \$ 12.00 per 100
- Fancheon** (18), a very fine flower, cream-white segments with very large expanded deeply edged orange-red cup, strong grower and particularly suitable for indoor culture.
\$ 2.15 per doz.; \$ 15.00 per 100
- Flamenco** (17), an exquisite flower with broad creamy white perianth and expanded deep seville-orange crown on a strong stem, a good quality of this flower is that the crown does not fade in sunshine.
\$ 3.00 per doz.; \$ 21.00 per 100
- FLOWER RECORD** (18), a fine variety of recent introduction, a bold flower with very large pure white perianth and a large expanding crown of orange with bright orange at margin, named "Flower Record" because of its very free-flowering habit, one of the best for forcing, recommended (see illustration page 53).
\$ 1.35 per doz.; \$ 9.50 per 100
- Gertie Millar** (18), a medium sized flower for garden decoration, pure white perianth with large creamy-white cup.

Hyacinths

The best handpicked quality, choice bulbs selected from healthy stocks, adopted for Bowls, Pots, Glasses and for Exhibition. We include only valuable varieties in our Collections.

CULTURE IN POTS

Hyacinths should be potted early in September for Christmas flowering and every fortnight after for succession.

After three or four months, remove to the forcing house as required, but care should always be taken that the bulbs are well rooted and the buds well out of the neck of the bulbs before beginning to force, as successful cultivation depends almost completely on these points. To keep the foliage dwarf and to assist the perfect colouring of the flowers, they should have occasionally a supply of liquid manure. Always use clean old pots during the growing period.

HYACINTHS ON GLASSES

Fill the glass with water (rainwater preferred) so as almost to touch the base of the bulbs, a few pieces of charcoal should be put in the glass, as this keeps the water pure. The next proceeding is the simple one of placing the glasses in any dark cool room, cellar or cupboard, until the sprouts are about 3 inches high, then they may be brought gradually to the full light. Although this system of culture is very simple, it is of the first importance that suitable bulbs should be obtained.

OUTDOOR CULTURE

For successful cultivation in the open air, Hyacinths may be planted any time from September to December. September and October being the best months; they like a light rich soil, the ground should be sufficiently drained to prevent it becoming too retentive of moisture; plant the bulbs at equal distances apart in circles or straight lines and about 5 inches deep. Never plant the bulbs when the ground is wet. They require a little covering of straw or a thin layer of leaves during the winter to protect them from frost.

Those marked * are easy forcing varieties and especially suitable for indoor culture

Hyacinths for Forcing and Bedding

These are second size bulbs, specially selected, hand-picked and perfectly healthy, which we can recommend with every confidence for forcing purposes.
If bulbs are forced in quantities in boxes or large pots, they may be transferred into Bowls, Jardinets etc. when coming into bloom; this may be done without the least check or injury to the blooms.

Royal Dutch Amaryllis

(Hippeastrum)

Through generations of skilful plant breeding a few Dutch growers have produced hybrid Amaryllis of magnificent proportion and breathtaking beauty in a good range of clear colours. Each colour grown from one exhibition type bulb by means of vegetative scale production method, which assured that every bulb in a given colour blooms exactly like another bulb of the same colour.

We offer a fine collection of named varieties, which are all tested in the Valleevue Test Garden of Cleveland (U.S.A.) 1950 and 1951.

Winter-Flowering Crocus Species

There are no bulbs that give more pleasure in the garden as these Crocus-species and a rockery may be made more attractive, not only because of the greater variety, but also by reason of the succession of flowers produced by the various species. We strongly recommend them for a trial, if you are not already acquainted with them. They should be much more extensively cultivated on account of their unsurpassed decorative beauty. Plant 3 to 4 inches deep.

Lilium candidum

Lilies for Early Shipment

The Liliums offered below will be shipped in the Fall.

Lilium candidum (The White Madonna Lily), of purest satiny-white silver chalice like flowers of delicious fragrance, limited stock. Height 4-5 feet (see illustration).

Dutch grown, fine mammoth bulbs:
45 cts. each; \$ 4.50 per doz.

Lilium excelsum (testaceum), handsome apricot coloured flowers with distinct scarlet anthers and reflexed petals, plant 4 in. deep in good loamy soil and half shade, lime loving, June flowering, height 5-6 feet.

Extra large, solid bulbs: **\$ 1.50 each;**
\$ 15.00 per doz.

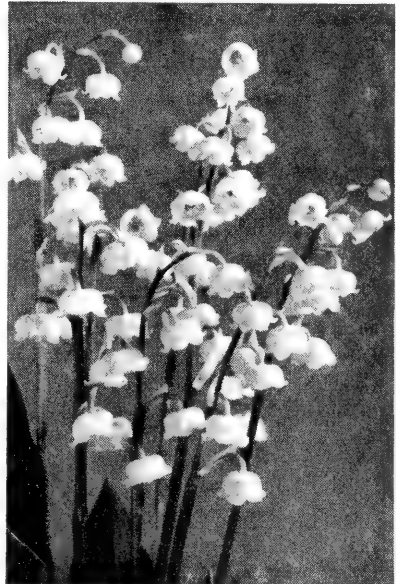

Lily-of-the-Valley (Convallaria) (German grown pips)

Outdoor Culture: The Lily-of-the-Valley is primarily a shade plant. It can be made to grow in the open, will do fairly well in ground shaded for part of the day, but luxuriates best in places under the shade of trees. The pips should be planted 3 to 4 inches apart and about 1½ in. deep in good rich garden soil. Such a bed, top-dressed in the late fall with well-rotted manure will do very well.

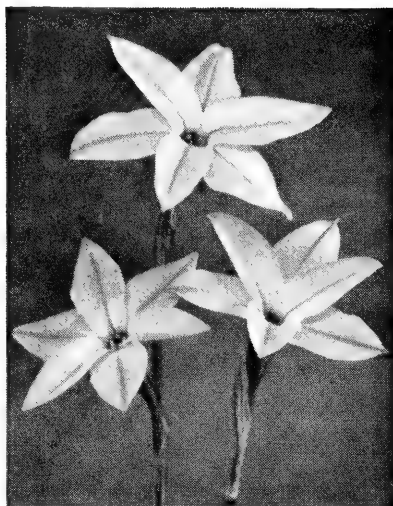

Indoor Culture: To grow Lily-of-the-Valley successfully indoors, they should be planted in pots or boxes, about 1 in. apart, leaving the crown exposed above the soil, do not press the soil too tight between and about the roots. To start off they like a bottom-heat of 65°-75° and the soil should be kept moist. Keep the crowns shaded from the light, until the spikes are 5-6 in. high, when they can be placed in full light (never direct sun-light).

Top-size pips for forcing **\$ 3.75 per 25; \$ 14.00 per 100**

Strong pips for garden use **\$ 3.25 per 25; \$ 12.00 per 100**

For many garden-amateurs the range of varieties offered in this list may be somewhat overwhelming, so if you are not familiar with them, please order our collections, which are made up very carefully as we want them to give complete satisfaction and therefore only include varieties of proven merit, the same time giving a wide range of colours.

Snowdrops

(*Galanthus*)

There is nothing more pleasing in the garden than a large batch of the snowy graceful blossoms of the Snowdrops at the end of January. Permanent plantings of Snowdrops should be done in partly shady situations.

Double Snowdrops (*Galanthus nivalis* flore pleno), the wellknown double snowdrop, having large globular blooms of peerless white with a touch of green inside, gracefully carried on their slender stems and most satisfactory for naturalization and mass planting.

85 cts. per doz.; \$ 6.00 per 100

Single Snowdrops

Single Snowdrops (*Galanthus nivalis*), the lovely common single Snowdrop of which folks say: "Fair Maids of February are back again", the favourite flower in the earliest part of the year; very attractive when grown in grass or woodlands and neglected shady places, where they are happy and never sorry (see illustration).

60 cts. per doz.; \$ 4.00 per 100

Elwesii, very large flowering species, with immense snowy-white globular flowers, very early. Asiatic form.

70 cts. per doz.; \$ 5.00 per 100

Sparaxis

Lovely bulbous plants of the same habit as *Ixias*. The flowers are even larger in size and produce a combination of colours rarely seen in any other race of bulbs or plants. They deserve to be cultivated more extensively. Very useful for pots, rock- and Alpine garden etc.

Beautiful Mixture.

50 cts. per doz.; \$ 3.50 per 100

Sternbergia

(Autumn-flowering)

Bulbs are not available after September 1st.

lutea, producing an abundance of rich golden yellow, Crocus-like flowers in fall. It thrives well and happily in a good drained position with a southern aspect, where they may be left undisturbed for years. Plant bulbs 8 to 10 inches deep. In cold districts they should be protected against severe frost. They may also be grown in pots or bowls to flower a few weeks after planting.

\$ 1.30 per doz.; \$ 9.00 per 100

GIFT TOKENS
